Materials

Information

Basic information or detail of the product that you maybe interested in. and also for the purpose of quick determination.

About Printing your Logo.

Below shows what kind of files you need and what to expect depending on which marking technique we use

Each Product can be mark with different printing options, Each printing option have its capabilities and limits – Size, number of used colours, etc.

Monochromatic or Single Color Logo

Laser Marking
Laser Engraving
Debossing
1 color Screen Printing

Colour Logo (separate)

UV Printing
Screen Printing
Digital Printing

Gradient Logo

UV Printing
Digital Printing
Heat Transfer
Sublimation

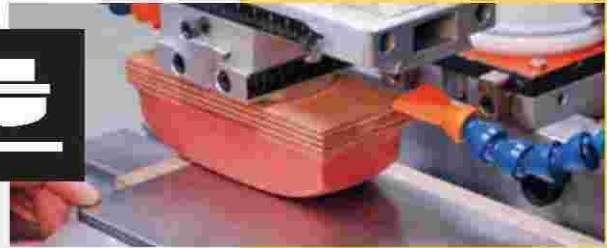

SCREEN PRINTING

The process whereby a logo is exposed into a mesh screen. Ink is then placed onto the screen and squeegee pushes the ink through the screen in the areas where the logo has been imposed.

PAD PRINTING

Printing process that transfers 2D image onto a 3D object. The unique properties of the silicone pad enable it to pick the image up from a flat plane and transfer it to a variety of surfaces, such as cylindrical, spherical, compound angles, textures, concave, or convex surfaces.

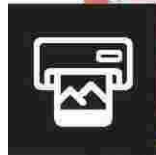

UV PRINTING

UV Printing is a form of digital printing that uses Ultraviolet lights to dry or cure the ink as it is printed. The printing method is best for branding that involves gradient effect and articles that need edge to edge printing.

DIGITAL PRINTING

A method of printing from a digital-based image directly to a variety of media. It usually refers to professional printing where small run jobs from desktop publishing and other digital sources are printed using small / large-format and / or high-volume laser or inkjet printers.

HEAT TRANSFER PRINTING

A digital image is printed onto a special vinyl surface, which is then placed into the product. The product is then placed in a heat press machine, where heat will merge the vinyl and the product.

JD ENGRAVING

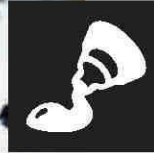

3D Laser engraving, which is a subset of laser marking, is the practice of using lasers to engrave letters, logo or even images inside the crystal which will be scaled to size and reproduced with exactly defined strokes.

Services

SUBLIMATION PRINTING

A process done by way of full-colour printer which is fitted with special sublimation inks. The logo is printed onto a special transfer paper, then placed into the product where heat is applied causing the inks to migrate from paper to product.

EPOXY DOMING

Doming is used to create a version of your logo by shaping a raised surface beneath the print. A mould is formed, printed and filled with epoxy which then is hardened to maintain its shape.

DEBOSSING

Debossing is the opposite of embossing as you are creating an indent in the material you are using. A metal die is stamped onto the front of the material you are using causing depressions that leave a imprint of the image on your products.

FOILING

Foil printing is a speciality printing process which uses heat, pressure and metallic paper (foil). This is used to create different shiny designs and graphics on various materials.

LASER CUTTING & ENGRAVING

A sheet of Acrylic have been used to replace less durable materials like glass in many different ways. Laser can cut through some pretty power ful stuff, even materials as hard as aluminium sheets, plastics and acrylic sheets.

METAL MARKINGS

A logo is etched into a product with a laser beam, replicating the logo with precise accuracy. The laser "burns" the top layer of the product off and reveals the layer beneath.

Antibacterial products

Keen to incorporate a health-aware twist to your next marketing campaign or in-house merchandise order? Look no further than our wide range of antibacterial promotional products.

From antibacterial coffee cups or antibacterial notepads printed with your corporate artwork to anti-bacterial ballpens branded with your logo, these promotional products are perfect for giving to your customers and colleagues alike, showing that your business truly cares about their well-being.

Silver Ions Eliminate Up to 99.99% of Bacteria

MORE HYGIENIC OFFICE PRODUCTS FROM ANTIBACTERIAL MATERIALS.

A special ISO 22196:2011 certified additive that releases silver ions is added to the ABS plastic we use for our Antibacterial products: the ions settle on the cell walls of bacteria and inhibit their survival and reproduction. The antibacterial effectiveness is confirmed by meticulous evaluation tests.

Microorganisms are inoculated in a sample of material and the surface is covered with a fine sterile film that promotes the spread of the bacteria, prevents evaporation and ensures contact with the antimicrobial surface.

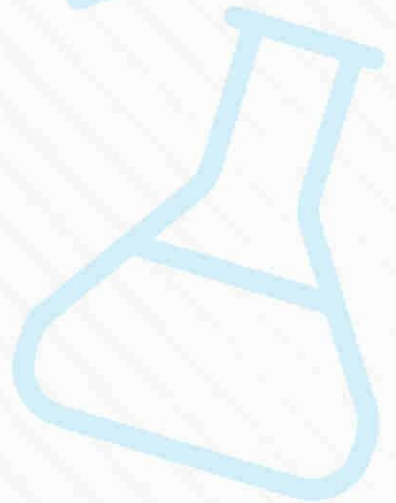

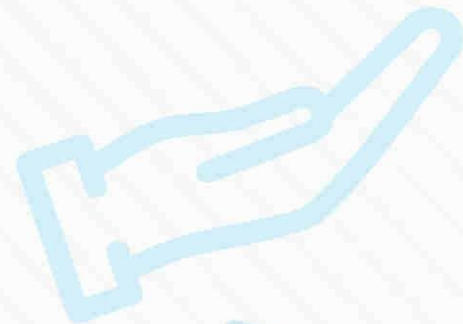

After incubating for 24 hours at 37°C, the microbe concentrations are measured, and the reduction in microorganisms compared to the initial concentrations calculated.

The 99.99% reduction in bacteria results in a good antimicrobial effect

The plastic used is antibacterial

Bacteria: up to 99,99% less

We Care about your health

Take care of yourself even when you write: the plastic we use on our Antibacterial collection prevents bacteria from settling on pen surfaces and passing from one hand to the other.

“ Double Protection, for you and for the Environment ”

The New Maxema antibacterial pens are made from 100% recycled plastic from European post-consumer products, to which it comes added a special additive that destroys up 99.99% of bacteria.

MAX-TA2-C-AB-RE

Flash Drive

makes an impressive & practical Corporate Gifts while promoting your brand at the same time.

USB Flash Drives

We specialize in importing quality USB Flash Drives for promotional purposes. Our USB Flash Drives are sourced from reputable factories using quality components such as Samsung or Toshiba and carry a warranty against defects. We pride ourselves on high standard levels and after sales services to ensure you peace of mind when dealing with us.

Reasons why you choose us as your USB Flash Drive source.

- We import original chips separately and after testing & quality checking, We fix them in USB shells.
- We never import duplicate or upgrade chips and we offer warranty against defect.
- Fast delivery from ready stock.
- Big variety and range of products to select.
- Competetive prices with higher quality.
- Mock Ups and E-Samples

What are upgraded chips?

Unfortunately some manufacturers using a lower capacity memory and selling as a higher capacity memory.

What are upgraded chips?

(1) They use a software to upgrade 1GB to 4GB. When using the chip in your computer it shows 4GB but can't accept files more than 1 GB because the real capacity is 1 GB.

(2) They use 4 pcs of 1 GB chip instead of 1 piece 4 GB memory. When you save a file more than 1 GB it will show an error and if you save a file less than 1 GB it will be saved but when you need to reopen the file, as it is not clear in which one of the chips is saved. again

**We never use upgrade chips
We use only original chips!**

Writing Instruments

Maxema Antibacterial: design and safety

Take care of yourself even when you write: the plastic we use on our Antibacterial collection prevents bacteria from settling on pen surfaces and passing from one hand to the other.

Why choose Maxema Antibacterial Pen?

The plastic used is antibacterial

Certified antimicrobial additive releases silver ions and prevents bacteria from settling on the surfaces of the pen.

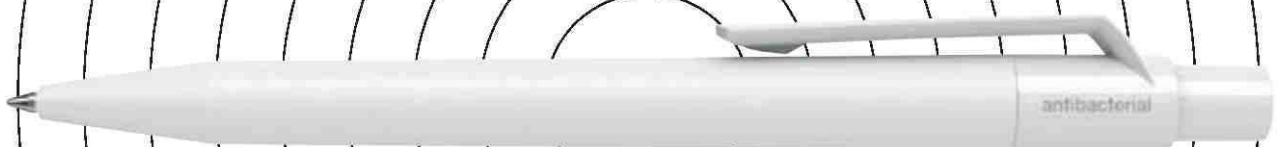

Bacteria: up to 99,99% less

Laboratory tests have shown that up to 99,99% of the bacteria on the pen are destroyed.

We Care about your health

Some bacteria can cause disease and infections: make your life still safer, even when you write.

maxema®

**The world is
changing and
we are changing
with it.**

**MADE IN ITALY
PREMIUM QUALITY**

**POST-CONSUMER
RECYCLED PLASTIC**

**WE MAKE
THE WORLD
WE LIVE IN.**

**Why use plastic once
when it can be turned
into something new?**

For our recycled plastic pens we use materials of European origin that are 100% derived from post-consumer products. When appropriately treated, these guarantee high quality plastics, certified and compliant with RoHS and REACH regulations.

**CHOOSE
BETTER
MAKE IT
LAST.**

**Who said good things
don't last?**

Beautiful to look at and environmentally friendly: with our pens design embraces sustainability. Our new models are made from recycled plastic with eight new shades inspired by the colours of Nature.

Icon Pure IC8-MATT-RE

Recycled plastic : Solid colours with matt finish.

Design embraces sustainability.

**Change is a choice and
it depends on each of us.**

MAX-B500-MATT-RE

Twist-action, Made of non-toxic, highly resistant ABS plastic. Recycled plastic matte textured barrel, Jumbo refill, Blue Ink

Printing Options :  

Antibacterial

It is made of antibacterial plastic containing a special additive which releases silver ions that prevent bacteria from colonising the surface of the pen.

Really Safe

The plastics employed with European and American FDA food contact regulations.

CLP compliant

It is rated as non hazardous the Regulation on Classification, Labelling & Packaging.

“ Double Protection, for you and for the Environment ”

The New Maxema antibacterial pens are made from 100% recycled plastic from European post-consumer products, to which it comes added a special additive that destroys up 99.99% of bacteria.

“ A Significant step forward toward the use of safe plastic. ”

Nature friendly

Made of non-toxic plastics, it has been designed to have a long life and to minimize the risk of harmful substances being released into the environment. Using a pen for as long as possible helps to reduce pollution and enables us to give full expression to the concept of promotion.

Green Chemical

It does not contain dioxin, phthalates, bisphenol A, antimony, arsenic, barium, cadmium, chrome, mercury, lead, polybrominated biphenyls (PBBs), polybrominated diphenyl ethers (PBDEs) or deca-BDE, and conforms to RoHS.

Looking to the future

Looking to the future, Made of plastic suitable for toy manufacture. (according to European standard EN 71-03 and U.S. FDA regulations).

“ Design that combines safety and environment friendliness.”

Security meets sustainability: discover our antibacterial pens in recycled plastic, with the Jumbo refill designed for last even longer.
